

GOALS & RECOMMENDATIONS

Drawing from an understanding of the existing conditions of Natick’s population and housing stock, and keeping in mind the identified issues and opportunities, the Natick 2030+ Team worked with Natick residents to develop goals and recommendations for the coming decades. Through the public process, residents helped form the goals they would like to see realized in their community. In survey responses, public meetings, and topic-based focus groups, community members helped identify options for areas of improvement and submitted specific recommendations. Those ideas and recommendations are organized by the following goals to support open space and recreational resources:

- 1. Provide for a mix of housing options at a variety of price points.**
- 1. Support seniors who wish to remain in their homes, as well as those who are looking for other housing types at different sizes and price points.**
- 1. Support the existence of naturally occurring affordable housing in Natick.**
- 1. Support housing options for special needs populations including group homes, shelters, single room occupancy housing, and service-oriented housing.**

The recommendations for achieving these goals are listed on the following pages under each goal heading. Listed next to each recommendation are the primary and support parties responsible for carrying out the recommendations in the years to come. A suggested time frame is also included, associated with the specific actions of each recommendation. In some cases, a recommendation may require coordination with multiple categories of Town functions (i.e. open space and transportation). If that is the case, the icon for that chapter will appear next to the recommendation which requires additional coordination. Metrics of progress areas are also included for recommendations that involve tracking progress over time.

4-7 YEARS 

While Natick’s overall population is anticipated to grow by about one percent between 2020 and 2030, a diverse housing stock is still needed to support both existing and future residents. The average number of persons in a household continues to shrink, and housing preferences for younger and older residents are changing. These two changes are creating a situation across most communities where the housing stock does not match the market demand. Younger professionals are delaying family formation and instead opt for smaller units in amenity-rich environments like Downtown Natick. Older residents are looking to move out of single-family homes to reduce costs, decrease maintenance responsibilities, and find housing with universal design elements.

If Natick wants to retain its older citizens and attract new residents to keep the community vibrant and active, housing will have to play a critical role. **One step the Town should take is critically reviewing the zoning in the parts of town where multi-family and mixed-use development are likely to be supported politically and financially. Locating higher intensity development in specific locations where impacts to existing single-family neighborhoods will be minimal could help increase housing choice and price diversity.**

Areas of Natick where zoning should be reviewed for the inclusion of multi-family housing and mixed-use development include:

- + Natick Center
- + West Natick
- + Golden Triangle
- + Route 9 and Route 27 interchange area

ECONOMIC DEVELOPMENT COMMITTEE

SUPPORT THE REDEVELOPMENT OF PROPERTIES IN NATICK CENTER BY ALLOWING AND ENCOURAGING MIXED-USE AND MULTI-FAMILY HOUSING THAT PROVIDES HOUSING OPTIONS AND BRINGS MORE PEOPLE TO DOWNTOWN TO SUPPORT LOCAL BUSINESSES.

Natick Center provides many of the amenities of urban living in a suburban setting. Access to an MBTA commuter rail station, restaurants and shops, civic buildings, and public spaces are just some of the amenities attracting new investment to Natick Center. Demand for new housing in mixed-use buildings in Natick Center is strong, and projects like Natick Common Residences and the conversion of the former American Legion building are proof that people want to live, work, shop, and enjoy Natick Center.

As the Town strives to create a more vibrant and active downtown, the addition of housing can bring a built-in market for businesses and reduce traffic impacts as residents can more easily walk to near-by amenities or even take the commuter rail to work. Housing in Natick Center is also more likely to include smaller units in new or refurbished buildings, providing a different housing choice for those who cannot afford or do not want a single-family home. **The Town should consider updating the existing base zoning district(s) covering Natick Center to allow more by-right integration of housing as a permitted use.**

INCREASE THE STOCK OF AFFORDABLE HOUSING.

Inclusionary zoning is a regulatory tool which communities can enact that creates a mandatory set aside of affordable units as part of a housing development project. Communities typically establish a percentage number which is applied to the total number of housing units in the project. For example, if a fifty-unit development were approved and built and the Town had an inclusionary percentage of 10 percent, then five residential units would need to be reserved for affordable housing. **The Town should consider adopting an inclusionary zoning bylaw with the following considerations at a minimum:**

- + The percentage set aside for affordable units (typically 10-20 percent)
- + Threshold for the number of units that would trigger inclusionary zoning (e.g. 10 units or more)
- + Allowing a payment in lieu of affordable units or allowing off-site units to count toward the inclusionary percentage
- + The Area Median Income (AMI) threshold for affordable units to count (e.g. 30%, 60%, 80% of AMI)

The formulation of an inclusionary zoning policy needs to be tailored to Natick's local market and size and type of housing most commonly developed. Setting the percentage of affordable units too high could cause development to slow substantially if developers are unable to financially cross-subsidize these units with enough market rate units. The Town should also consider how low to set the unit threshold for triggering the inclusionary zoning requirement. Setting the threshold too low could stymie smaller infill or rehab projects, while setting the threshold too high could miss opportunities to capture affordable units.

METRIC

Adopt an Inclusionary Zoning Bylaw.

1-5 YEARS

In addition to the regulatory component of inclusionary zoning, the Town should also **designate a recipient fund for payments in-lieu-of affordable units if Inclusionary Zoning becomes a reality.** If developers are able to make payments in lieu of creating actual affordable housing units, the Town should ensure that money is going into a designated fund to be used by another entity in Natick for the creation or preservation of affordable housing. Many communities designate the Affordable Housing Trust as the recipient of these funds.

The HOOP District has been successful in adding affordable units in locations in and around Natick Center where Town Meeting has allowed it. In existing HOOP-I and HOOP-II Districts, the Town allows for higher intensity housing development as long as there is a 15 percent set aside for affordable units as part of the overall unit mix. The HOOP Districts also allow a higher density of development at 17 units per acre in the HOOP-I and 12 units per acre in the HOOP-II. **An expansion of the HOOP Districts to other key development parcels in Natick Center would provide incentives to bring in additional housing and at the same time ensure a portion of the new housing is set aside as affordable.**

EXPLORE OPPORTUNITIES FOR THE NATICK HOUSING AUTHORITY TO ENTER INTO A PUBLIC/PRIVATE PARTNERSHIP WITH A DEVELOPER TO HELP SHARE THE COSTS OF MODERNIZING PUBLIC HOUSING AND INTEGRATING A MIX OF INCOMES TO HELP OFFSET DEVELOPMENT COSTS.

Modernizing existing public housing facilities in today’s financial climate is challenging for large cities and small towns alike. While limited resources do allow for some interior or exterior maintenance and modification, the vast majority of our nation’s public housing stock is substandard and needs to be replaced. **As Natick evaluates improvements to its existing public housing facilities, some consideration should be given to creating a public/partnership with an outside developer to help finance and construct new public housing for Natick’s most vulnerable populations.** To accomplish this, the Town would have to incorporate a mixed-income strategy to any new redevelopment so market-rate housing units could be used to cross-subsidize the deeply affordable units needed to maintain or increase the number of public housing units. This strategy would require allowing a higher intensity of development on the site to accommodate both affordable and market rate units, but would result in substantial improvements to the housing stock and the quality of life for residents.

R1.3 **1-5 YEARS** 

UPDATE THE TOWN’S HOUSING PRODUCTION PLAN.

Natick last completed a Housing Production Plan (HPP) in 2012. Since then, a number of new housing developments have been completed and additional projects are under construction or in the pipeline. At the same time, housing prices have continued to climb and availability of units has declined. Completing an HPP gives the Town a deep assessment of current housing conditions, future projections, and a series of recommendations for addressing housing needs in the community.

According to the State’s Subsidized Housing Inventory (SHI), as of September 2017 the Town has 10.4 percent of its year-round housing stock preserved as affordable. This is just over the 10 percent threshold required through Massachusetts Chapter 40B. When the new US Census is conducted in 2020, there is the possibility that Natick will see an increase in year-round housing units thereby reducing the denominator in the 40B affordable housing calculation. If that occurs, the Town could slip be-

low the 10 percent threshold opening itself up to additional unplanned 40B housing developments. **The creation and adoption of an HPP would provide the Town with a tool to plan for the types of affordable housing it would like to see in the locations where the Town feels it is most appropriate and desirable.** If the Town creates affordable housing in a quantity great enough to meet the certification thresholds in a given year it can apply for Safe Harbor status from DHCD. This again provides opportunities for the Town to pro-actively plan for affordable housing without the unknowns of unplanned 40B developments.

Complete and adopt an updated Housing Production Plan.

1-5 YEARS 

After the completion of the HPP, the Town should **conduct focus groups with Planning Board, Selectmen, and Town Meeting members to help educate them about affordable housing needs, policies, programs, and financing.** These workshops and/or focus groups can help facilitate the often difficult conversations around housing need, housing production, housing type, financing, and where new housing should be located. This can also be an opportunity to discuss how best to implement the recommendations of both the Comprehensive Master Plan and the updated HPP.

AFFORDABLE HOUSING TRUST FUND BOARD

FINANCE COMMITTEE

CREATE A DEDICATED SOURCE OF FUNDING THROUGH TOWN MEETING FOR THE HOUSING TRUST.

R1.4 **1-5 YEARS** 

One of the biggest challenges to creating affordable housing locally absent a development partner is funding. Fortunately, Natick has an Affordable Housing Trust Fund and a Board that oversees the funds available for affordable housing production and preservation, but the Board is limited in scope by the funding available. Absent payments that could come in the form of fees in lieu from an Inclusionary Zoning Bylaw, **the Town could consider setting up an annual disbursement of funds to the Trust through Town Meeting.** This consistent source of funding would allow the Trust plan and program funding for both short-term and long-term projects and programs. The Trust could then become much more proactive in seeking out projects rather than reactionary with the uncertainty of funding from year to year.

Establish a recurring line item in the annual budget for the Affordable Housing Trust Fund.

GOAL 2

ASSIST LOW INCOME HOUSEHOLDS IN FINANCING HOME REPAIRS.

In an effort to help residents remain in their homes and make home repairs accessible to those who can least afford it, the Town could consider creating a no- or low-interest rate loan program specifically for home repairs. The Town belongs to the WestMetro HOME Consortium and could access funds through their annual allocation to establish a program. This fund could function as a dedicated revolving loan fund and the Town could gift an amount to match what is available through the HOME Consortium to increase the pool for loans. Other communities around the Commonwealth have similar programs, although many to do have dedicated revenues through CDBG and HOME funding that is not shared with other municipalities through a consortium. The Town of Weymouth is one such community that has established a zero interest rate home improvement financing and technical rehabilitation assistance program.

Establish a loan fund and assist five homeowners with rehabilitation projects.

ZONING BOARD OF APPEALS

1-5 YEARS 

CHANGE ZONING TO ENABLE THE PRODUCTION OF A VARIETY OF HOUSING TYPES TO HELP SENIORS TO STAY IN NATICK.

Sometimes referred to as “granny flats,” accessory dwelling units (ADU’s) are secondary homes built on existing residential properties, either separate from or connected to a principal structure. While generally smaller in size, ADU’s can vary greatly in scale and amenities.

ADU’s can provide cost-effective housing in places where open land on existing lots may not be fully utilized. This helps minimize their impacts on infrastructure, and typically provides options for (increasingly common) one- and two-person households. By eliminating the largest cost driver of most new homes, (additional land already owned by the

principal homeowner), ADU’s can provide new housing options at a fraction of the cost of most

Example of a detached ADU.

“affordable units.”

Fitting an ADU on an existing lot or as a careful extension of another home, communities can add much-needed housing with a greatly limited impact on a neighborhood’s scale or feel. Building an ADU can also be a financial incentive for principal homeowners; the supplemental income a rented ADU can provide may help senior residents stay in their home.

Most barriers to the construction of these units are regulatory. Proponents contend that owner-occupancy rules are the most damaging to ADU construction. Municipalities in California, Oregon, and British Columbia have allowed ADU’s after settling on requirements for lot sizes, setbacks, parking, and scale. Boston is in the midst of its own pilot program in select neighborhoods in 2018, and New Hampshire has released a guide for municipalities looking to make ADU’s a reality. Some municipalities are working to provide revolving loans and other incentives to make ADU’s financially feasible for homeowners considering them. **The Town should consider how and where ADU’s could serve as an effective housing option and design zoning and performance standards to that fit with Natick’s existing development pattern and neighborhoods.**

COUNCIL ON AGING

While assisted living facilities are not the cure-all for senior housing needs, they can provide yet another option for seniors who are looking for additional care or assistance as they age in the community. Natick has struggled to find the right balance in their approach to zoning for assisted living over the last year or two, and has yet to settle on a set of performance measures or a geographic location that can garner wide support at Town Meeting. As the community continues to struggle with this issue, senior housing needs grow. Finding ways to allow assisted living in the right location and with minimal impacts to surrounding properties will be key to introducing this new housing option in Natick. **The Town should create zoning that allows assisted living in geographically appropriate areas and minimizes impacts on surrounding properties.**

Cluster zoning is a regulatory tools municipalities can use to accommodate residential development on a parcel of land while preserving open space and natural vegetation and views along roadways. The primary principle behind cluster development is to create smaller lots and smaller homes and gather them together in one area of the parcel while preserving the remainder of the parcel as open space. Under conventional subdivision rules, the entirety of the parcel could be developed using standard lot sizes, required infrastructure, and the minimum set aside for open space.

Natick has regulations for cluster development, but they are limited to parcels greater than twenty-two acres in size. Since the Town is most built out at this point in time, there are very few parcels available that meet that minimum size threshold.

COMMUNITY AND ECONOMIC
DEVELOPMENT DEPARTMENT

SUPPORT

PLANNING BOARD

Therefore, **the Town should consider reworking the Cluster Bylaws to better suit the development pattern and opportunity sites left in Natick. Some key considerations the Town should discuss as it pursues an update to the Cluster Bylaws include:**

- + What is the ideal minimum lot size requirement?
- + What type(s) of housing should the Bylaw allow or encourage? Should it be limited to single-family homes, or should it include townhouses, duplexes, four-plexes, cottages, etc.
- + Should the Town allow a higher number of units as an incentive to encourage cluster development over conventional subdivisions?
- + What percentage open space set aside should be required?
- + Does the Town want to write the Bylaw in such a way as to preserve views or natural corridors along certain roadways?

LOCAL BANKS AND REALTORS

FORM A PARTNERSHIP BETWEEN THE COUNCIL ON AGING AND LOCAL REALTORS AND BANKS TO BRING IN HOUSING OMBUDS WHO COULD SERVE NATICK SENIORS AS RESOURCES ON HOUSING OPTIONS AND FINANCIAL INQUIRIES.

Throughout the planning process, the issue of senior housing options and affordability came up repeatedly. This is an issue challenging Natick and hundreds of other communities across the Commonwealth. One key challenge with seniors is getting the word out about housing programs and options, particularly to those residents who are not connected to digital media and communication platforms. Even those residents who are connected can find the variety of programs, the application process, and the limitations confusing and difficult to evaluate. **One option is to create an in-town resource through the Council on Aging that uses local lending and real estate experts as ombuds to seniors who are looking for housing options.** These local experts could help walk seniors through available housing options, financing programs, tax abatement programs, advice on buying or selling a home, and more.

GOAL 3

Support the existence of naturally occurring affordable housing in Natick.

R3.1

4-7 YEARS

LEAD

SELECTBOARD

SUPPORT

FINANCE COMMITTEE

IMPLEMENT PROGRAMS AND REGULATORY CHANGES THAT WILL HELP NATICK RETAIN MORE OF ITS EXISTING STOCK OF NATURALLY OCCURRING AFFORDABLE HOUSING.

As Natick’s housing stock continues to increase in price, there are fewer and fewer affordable housing options that are not deed restricted and only available to those at a qualifying income level. The stock of naturally occurring affordable housing is often bought up by investors or developers, demolished, and rebuilt as a much larger and more expensive single-family or two-family home. Natick has become a very desirable community to live, and as a result housing prices and demand now support tear down/rebuild activity.

There are some neighborhoods that have smaller more affordable homes that could be considered for a pilot tax abatement program where **the Town could offer a break on property taxes in return for the preservation of the home over a certain period of time. The Town could also create a resale formula that would limit the sale price to a certain percentage of the true market value in return for a continuation of the property tax abatement.**

Natick has an existing demolition delay policy which calls for a six-month cooling period for structures that qualify as historic. During this period, the Town issues a stay on the demolition of the property in hopes the owner will choose to rehabilitate the existing structure instead of tearing it down and rebuilding some larger and more valuable. Demolition delay can help maintain the stock of historic structures in town, and can also be used as a tool to help preserve parts of the housing stock that might be more affordable than new housing units. **To further enhance the demolition delay policy, a recommendation of Master Plan is to extend the delay period from six month to one year.**

1-5 YEARS
